## Personal Summary

Third-year Computer Science student at BINUS University specializing in Artificial Intelligence, with hands-on project experience in machine learning, natural language processing, and security monitoring. Combines programming and analytical skills to build AI applications, work with data, and investigate security events. Incoming SOC Intern at BCA, starting February 2027.

## Education

**Bina Nusantara University** Bachelor of Computer Science — September 2024 - Expected 2028

- GPA: 3.74

**Rework Academy Cyber Security Bootcamp** — August 2026 - October 2026

- Covered SOC operations, incident response, penetration testing, web security, and Linux fundamentals.

## Experience

**Upcoming SOC Intern** Bank Central Asia — February 2027

**CTF Problem Setter | Reverse Engineering** IFEST 2026 — September 2026

- Developed reverse engineering CTF challenges and monitored participant progress to ensure fair competition.

**CTF Problem Setter | Forensics NCW 2026** — November 2026

- Developed reverse engineering CTF challenges and monitored participant progress to ensure fair competition.

**Apprentice PETIR Cyber Security** — May 2026 - Present

- Participated in internal and external CTF competitions and collaborative cybersecurity community activities to strengthen technical knowledge and problem-solving skills.

**Bina Nusantara University** SASC Scholarship Mentor — Feb 2026 - Juli 2026

- Mentored up to 6 mentees through approximately 25 sessions covering Computer Security, Calculus, Scientific Computing, NLP, Computer Vision, Software Engineering, and Machine Learning.

**Volunteer Buddy | Buddy Tour 2026** — August 2026

- Accompanied visually impaired students during an educational visit to Indonesia Science Center (PP-IPTEK), providing guidance, mobility assistance, and descriptions of surrounding exhibits.

## Skills

- **Programming languages:** Python, C, HTML, CSS, JavaScript, SQL, Git, Bash
- **Tools:** BurpSuite, Docker, Kali Linux, Ghidra, Wireshark, Autopsy, SIEM
- **Cybersecurity:** Security Monitoring Fundamentals, Digital Forensics, Reverse Engineering, OSINT, Network Security Fundamentals
- **Artificial Intelligence:** Natural Language Processing, Computer Vision, Machine Learning, Model Evaluation
- **Languages:** Bahasa Indonesia (Native), English (Fluent)

## Projects

- Malware Classification via Images: Classified malware using machine learning and image-based representations.
- Automatic Meeting Summarizer: Built a Flask web app to summarize meeting transcripts using PEGASUS.
- House Price Prediction: Built an XGBoost prediction model with an interactive Streamlit interface.
- Mini SOC Lab: Used Wazuh SIEM and Sysmon to monitor Windows telemetry and investigate security events.
- Portofolio : Links
